

Higher-Level Apprenticeship Programme

Earn while you learn and work toward a fully funded honours degree in mechanical, electrical, and sustainable design engineering.

Job Overview

This apprenticeship combines paid employment with a professional qualification from a local college or university. You'll gain hands-on experience in building services engineering while developing the skills and knowledge to launch a successful career.

Why Join Us?

- ◆ Work in a leading building services engineering practice
- ◆ Access a clear pathway to a professional qualification
- ◆ Enjoy paid employment with no course fees
- ◆ Learn from experienced professionals in a supportive environment
- ◆ Contribute to high-value projects across multiple sectors, from healthcare centres and schools to film studios and tourist attractions

Job Description

This role is ideal for a school leaver with a strong interest in engineering who wants to work in a dynamic, forward-thinking consultancy.

As a Higher-Level Apprentice, you will:

- ◆ Gain experience on exciting, real-world engineering projects
- ◆ Receive guidance from experienced mentors and technical experts
- ◆ Build essential engineering knowledge in design, project delivery, and sustainability
- ◆ Develop skills in Building Information Modelling (BIM), including AutoCAD, Revit, and specialist software
- ◆ Support diverse projects that make a real impact in the built environment

Who We're Looking For

We're seeking ambitious and motivated school leavers who are enthusiastic about engineering and eager to learn.

To be eligible, you should:

- ◆ Have recently completed GCSEs and A-Levels (or equivalent)
- ◆ Be enthusiastic, dependable, and committed to professional and academic growth
- ◆ Demonstrate excellent written and verbal communication skills
- ◆ Display a professional, presentable manner
- ◆ Manage your time effectively and work well independently and in a team
- ◆ Be proficient in Microsoft Office (Excel, Word, Outlook) and willing to learn new engineering software
- ◆ Have any relevant experience from school projects, part-time work, or volunteering (helpful but not essential)

Choose Semple & McKillop

At Semple & McKillop Ltd, you'll join a company recognised for innovation, technical excellence, and strong client relationships. We foster continuous learning, professional growth, and long-term career development, ensuring you have the support and opportunities to thrive in the building services engineering sector.
